KEY GUIDELINES FOR AUTHORS

- All manuscripts require an abstract which should be informative and not exceed 100 words.
- The total number of references should not exceed 35; multiple references (containing more than one paper) should be avoided.
- The number of figures should not exceed 5 normal-sized figures.
- The manuscript should normally not exceed the equivalent of 2500 words including text, tables and figure captions (approximately 12 double-spaced pages).
- Authors are encouraged to submit a disk with an electronic file exactly matching the hard copy of their manuscript.
- Manuscripts should be sent to one of the editors or preferably to a member of the Advisory Editorial Board who is familiar with the research field. When submitting to an editor, authors are urged to suggest the names of three appropriate referees.

The complete Instructions to Authors are on the last pages of each volume.

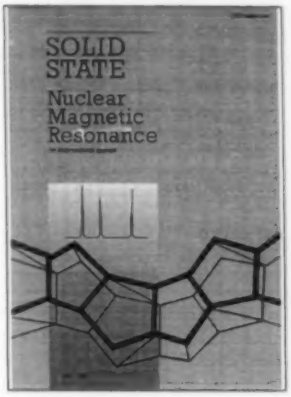
Solid State Nuclear Magnetic Resonance

An International Journal

- *"Papers of uniformly excellent quality..."* **(Nature, October 1993)**
- **Only truly international journal dealing with all aspects of solid state NMR**
- **Short communications section: rapid publication of research results when fast publication is warranted**
- **Free contents alerting service via e-mail**



Editor-in-Chief:
J. Klinowski, *University of Cambridge, Department of Chemistry, Lensfield Road, Cambridge CB2 1EW, UK. Fax: (44-1223) 336362, E-mail: jk18@cus.cam.ac.uk*

AIMS AND SCOPE:
The journal *Solid State Nuclear Magnetic Resonance* publishes original manuscripts of high scientific quality dealing with all experimental and theoretical aspects of solid state NMR. Typical areas for applications include: solid state chemistry, materials science; surface chemistry, catalysis; polymer science and characterization; geology, mineralogy; biochemistry, biology, medicine; physics.

For:
Academic and Industrial Researchers engaged in the development of new NMR techniques and their application to structural analysis.

AIMS AND SCOPE:

The journal contains papers which consider fundamental aspects of mass spectrometry and ion processes and the study of the application of mass spectrometric techniques to specific problems in chemistry and physics. The *International Journal of Mass Spectrometry and Ion Processes* is the leading journal for publishing new developments in the field.

For:
All Mass Spectrometrists and others interested in the chemistry and physics of charged particles.

Electronic manuscripts: Electronic manuscripts have the advantage that there is no need for the rekeying of text, thereby avoiding the possibility of introducing errors and resulting in reliable and fast publication.

Your disk plus three, final and exactly matching printed versions should be submitted together. Double density (DD) or high density (HD) diskettes ($3^1/2$ or $5^1/4$ inch) are acceptable. It is important that the file saved is in the native format of the wordprocessor program used. Label the disk with the name of the computer and wordprocessing package used, your name, and the name of the file on the disk. Further information may be obtained from the Publisher.

Authors in Japan please note: Upon request, Elsevier Science Japan will provide authors with a list of people who can check and improve the English of their paper (*before submission*). Biophysical Chemistry

An International Journal devoted to the Physics and Chemistry of Biological Phenomena

- **Only journal especially devoted to research on borderline of chemistry, biology and physics**
- **Letters section: publication time of about 3 months**
- **Free colour pictures and other supplementary material on www**
- **Free contents alerting service via e-mail**

Principal Editor:

A. Watts, *University of Oxford, Department of Biochemistry, South Parks Road, Oxford OX1 3QU, UK. Fax: (44-1865) 275234/59, E-mail: awatts@bioch.ox.ac.uk*

AIMS AND SCOPE:

The journal publishes original letters and papers, mini-reviews, reports from meetings and special issues describing research on biological phenomena in terms of the principles and methods of physics and chemistry. It is receptive to articles which deal with biological molecules and systems, and to papers which treat systems serving as models for these. Treatments, phenomenological as well as molecular, of the interactions, structure and biological functions of individual biological macromolecules and of supramolecular structures, are also within the journal's remit.

For:
Biophysicists, Physical Chemists, Chemical Physicists and Biochemists.
